E.H.E. EurAka News 3/2018

New strategic partnership of the E.H.E. EurAka with the City Unity College in Greece's capital of Athens

Initiated by the long-term partner of the E.H.E. EurAka, the FINE Institute in Bucharest, a new powerful partnership has emerged in Athens.

Bachelor, Master's, and doctoral studies are starting to be delivered in Athens. The Ministry of Education of Greece has officially approved the E.H.E. EurAka and allows her to deliver these studies on Greek territory. The private Swiss University also evaluates this as strengthening her international position in the academic system further. This especially, as it demonstrates the value of an E.H.E. EurAka degree in the area of the Process of Harmonisation of Higher Education in Europe, a.k.a. Bologna Process.

Subject areas on offer comprise business, management, and economics but as well sports and law. Particular emphasis will be on studies in psychology.

Welcome City Unity, welcome new students! There is a lot to be discovered with **Higher Education Swiss made - delivered in Greece.**

Setting the *Pace* further, the E.H.E. EurAka is proud to further announce her new strategic partnership in Southeast Asia:

The group of the Pace Colleges will offer the programmes of studies of the E.H.E. EurAka in Malaysia, Myanmar, Cambodia, Vietnam, and China.

The E.H.E. EurAka looks forward to her new students on this distant continent.

The Accreditation-Certification-Conference (ACC) in Holistic Quality Management in Science and Education

Five established and internationally acknowledged bodies and academic institutions have constituted the new ACC. Task and objective of the ACC is the next standard of certification and accreditation of educational and higher education institutions according to acknowledged standards, which - as the decisive difference - are based on internationally recognised norms.

The constituting members of the ACC consist of the

- **QS Zürich AG:** Institution for Certification accredited by the official Akkreditierungsstelle SAS, Switzerland
 - **DeuZert:** Certification in Education and Economy, Akkreditierungsstelle DAkKS, Germany
- Founding Member of the

IFCES for the ISO 29990: 2010 in Education

- **DBIC International GmbH,** Business Unit Quality Management: TÜD-TÜV Cooperation, ICP International Consulting Partner
- **University of Sopron,** Faculty of Economics, part of the Academy of Sciences of Hungary
- **iPAT Institute** of the University Nuremberg-Erlangen, Germany

The ACC will strictly work according to the internationally acknowledged DIN EN ISO/IEC norms. The holistic perspective assures that education and sciences are covered to their full extent and not limited to particular areas alone.

The ACC is a non-profit Conference allowing its members from accreditation/certification and academia to develop independent standards respecting the freedom of science and education. The President of the ACC is the E.H.E. EurAka President Prof Dr Diener. International institutions have already expressed their interest to participate.

Professors from Mexican University have become E.H.E. EurAka Research Students.

In late summer, two professors from a Mexican University have enrolled with the E.H.E. EurAka for their PhD studies. This enrolment demonstrates that the E.H.E. EurAka's reach and scope is not limited to Europe, Africa, and Asia alone but has reached after the USA Latin America on high level.

Interest in studying with our private Swiss University is now found in the Americas as well.

A series of new two-day seminars starts in November: **the High Performance Organisation.** In collaboration with **Dr André de Waal,** HPO Centre, the Netherlands, participants are introduced to what makes high performance and how to achieve it. Action-based learning underpins the practice-orientation of the seminar.
