

Master in Agricultural Management

Standard Period of Studies: 18 months

ECTS Credits: 90 in total

The Master in Agricultural Management is a Postgraduate Degree preparing students to become responsible managers in an agricultural organisation's hierarchy or as self-employed experts/consultants. The course's purpose further is to educate managerial sustainability and responsibility. That combines two elements:

- The understanding of the general picture and wider implications by which agricultural organisations are guided in general.
- A particular focus on contemporary agricultural management, whose specifics consciously take the typical needs and challenges of this pathway of specialisation into consideration.

The Master in Agricultural Management supports graduates through sophisticated knowledge and examples of best practice being fully concentrated on latest discoveries and trends.

Modules of the Master in Agricultural Management:

1. Agricultural Strategy & Sustainability
2. Green Marketing Management
3. Accounting and Finance
4. Planning and Managing Change
5. Agricultural Supply Chain Management
6. Organisational Behaviour & Corporate Social Responsibility
7. The Holistic Management of the Agricultural Organisation
