Education and Research)

E.H.E. EurAka Festive Days Special

What will happen at the E.H.E. EurAka in the Year 2019?

"On the move", "even more progress" - likely these are the best words to describe the coming six first months.

Firstly, the E.H.E. EurAka will warmly welcome students from many new countries, such as Myanmar, Indonesia, Egypt or Saudi Arabia. A next new development is that the Institute for Economy & Law is preparing those programmes, which will lead to the degree of the LL.M and LL.B.

A key activity of global impact is the cooperation with the Accreditation-Certification-Conference for Holistic Quality Management in Education and Research. A cooperation with the Institutes of QS Zurich AG, Switzerland, and DeuZert, Germany both internationally and nationally approved certification institutions. To these add further partners from academia. These certified quality standards are according to approved and recognised standards of international governments - the all and decisive difference.

Most importantly, the E.H.E. EurAka's new Swiss campus is near - future-oriented, prestigious, and impressive.

**To all our Friends,
Students, and Partners:
The E.H.E. EurAka wishes
peaceful festive days and
a prosperous and
successful Year 2019.**

A Reflective Review on the Year 2018

The year 2018 has been very busy and successful - nationally and internationally.

Internationally, the E.H.E. EurAka has concluded many new partnerships in Africa, Asia, and Europe. It would be unjust to highlight the one or the other. All of them are equally important to the private Swiss University. Undeniable fact is that the E.H.E. EurAka has strengthened her international standing and profile considerably. New territories, where studies are delivered, mean of course increased responsibilities. That is accordingly echoed in the new position of the Vice President International.

Many new programmes of

studies have been introduced. Not only in economy, but as well the new Institute for Economy & Law presented her new MSc programmes.

Nationally, the new partnership with the influential German Association of SME, the BVMW, counts much adding hundreds of industry connections. The long-term partnership in research with the iPAT Institute of the public German University Nuremberg-Erlangen was renewed. But the highlight certainly was to be awarded with the prestigious Research Seal "Innovative through Research".

Undoubtedly, the year 2018 has been challenging. However, all these achievements underpin that successful progress took place and allows to look forward to the new challenges.

**E.H.E. EurAka
Christmas Holidays:**

All staff of the E.H.E. EurAka have worked hard throughout the year. Therefore deserved holidays will take place:

The E.H.E. EurAka will be closed from December 21st to January 1st.

Between January 2nd and 6th her operations will be limited.

Normal business will restart on January 7th, 2019.

Thank you for your understanding.
